Work Experience

Phrozen Technology Co., Ltd.

2024 Aug ~ Now

Fullstack Engineer

- Developed PhrozenGo mobile application using React Native
- Built backend services with NestJS and admin dashboard with NextJS
- Deployed company services on AWS EKS with CI/CD via GitHub Actions

Amber Studio

2022 Apr ~ 2023 Mar

Unity Engineer

- Maintained Rumble Heroes, a mobile game developed by Amber
- Developed a rhythm game prototype in Amber's Heroes of Innova, winning 1st place among 10 teams
- Implemented unit testing using Unity Test Framework

Xinfuyi Marketing Investment Co., Ltd.

2021 Mar ~ 2022 Jan

Developed [Cube Mahjong](#), a casual mobile game launched in Nov 2021

- Built Unity client with Photon PUN, integrated Firebase and Google/Apple payment systems
- Developed Mahjong game server using Go + Agones, deployed on GKE with auto-scaling

International Games System Co., Ltd.

2017 Sep ~ 2020 Jul

Senior Software Engineer

- Developed mobile game [Goodluck777](#), created 10+ mini-games (slots, cards, fish games, etc.)
- Implemented visual effects with Unity Shader, wrote slot machine server logic in Python
- Refactored slot machine module, introduced Jenkins CI/CD, promoted to client team leader in 2019

Projects

Unreal Side Project

2023 Mar ~ 2024 Feb

- Built an online ARPG as a learning project, covering game client, launcher, website, and backend server
- Built game client and dedicated server with Unreal (C++ & Blueprint), implemented skills using GAS
- Backend: Golang + Agones + Redis + Spanner with gRPC over SSL, hosted on GKE

Unity Side Project

2020 Aug ~ 2021 Apr

- Developed a multiplayer party game, learned DOTS architecture, New Input System, and Addressable Asset System

- Developed a mobile AR application using Unity to attract citizens to collect multimedia data in smart cities

Skills

Game Development

- Unity, Unreal Engine

Web & Mobile Development

- Frontend: React Native, NextJS
- Backend: NestJS, Golang, Firebase

Cloud Services

- AWS: EKS, CloudFront, S3, Lambda, SES
- GCP: GKE, Compute Engine, Cloud Storage, Spanner

Programming Languages

- C#, TypeScript, Golang, C/C++, Python

DevOps

- Git, GitHub Actions, Jenkins, Kubernetes

Education

M.S., Computer Science, National Tsing Hua University

2015 Sep ~ 2017 Jun

- Advisor: Dr. Cheng-Hsin Hsu
- Research Fields: Mobile Applications, Multimedia Systems
- GPA: 3.87/4.3

B.S., Computer Science, National Central University

2011 Sep ~ 2015 Jul
